

North Texas FSDO (SW19) FAA Safety Team (FAASTeam) presents:

Stick n Rudder

Since the pilot is the most important piece of equipment in the aircraft.....What are some of the things we can do to maintain REALLY good basic skills, especially in this day of technology? What could (or should) you do to maintain "currency" beyond just flying regularly, or making 3 take-offs and landings? Gayla will look at some stick 'n rudder maneuvers and offer some thoughts on improving communication at uncontrolled airfields. Here is a great opportunity to join the discussion, contribute your perspective, and hear what others have to say. Learn some new ideas and get some new insights for improving your "stick 'n rudder skills..."

Directions: The Vintage Flying Museum (VFM) is located at the Fort Worth Meacham Airport (KFTW). From I-820 in north Fort Worth, go south on Texas 287 (Main Street), turn RIGHT (westbound) on 38th Street (just south of the Fire Station) and follow the road around to the parking area in front of the VFM hangar. The Conference Room is on the south side of the hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
